

Everyone who enjoys birds and birding must always respect wildlife, its environment, and the rights of others. In any conflict of interest between birds and birders, the welfare of the birds and their environment comes first.

Code of Birding Ethics

1. Promote the welfare of birds and their environment.

a. Support the protection of important bird habitat.

b. To avoid stressing birds or exposing them to danger, exercise restraint and caution during observation, photography, sound recording, or filming.

The VSO does not endorse the use of recordings or other artificial lures to attract birds. Such methods may pose a strain on the energy birds invest in survival, courtship and territorial defense, especially during the breeding season, and can be a distraction to other birders in heavily birded areas. When used with discretion by skilled practitioners, recordings can be of benefit in scientific research and educational settings, but should be avoided for recreational birding and photography.

Keep well back from nests and nesting colonies, roosts, display areas, and important feeding sites. In such sensitive areas, if there is a need for extended observation, photography, filming, or recording, try to use a blind or hide, and take advantage of natural cover.

Use artificial light sparingly for filming or photography, especially for close-ups.

c. Before advertising the presence of a rare bird, evaluate the potential for disturbance to the bird, its surroundings, and other people in the area, and proceed only if access can be controlled, disturbance minimized, and permission has been obtained from private land-owners. The sites of rare nesting birds should be divulged only to the proper conservation authorities.

d. Always seek to minimize negative impacts on bird habitat; climate change and habitat degradation are significant threats to bird diversity in Virginia. Birders should stay on roads, trails, and paths where they exist. Birders should also carpool whenever possible and seek modes of transportation that produce the lowest greenhouse gas emissions.

e. If pets are permitted, be considerate by keeping your pet under control or on a leash.

2. Respect the law, and the rights of others.

a. Do not enter private property unless you have obtained the owner's explicit permission. Do not assume that permission extends beyond a specific visit unless the owner says so. Abide by all rules set forth by the land owner. Never post a landowner's name or property location concerning a sighting unless you have specific permission.

b. Follow all laws, rules, and regulations governing use of roads and public areas, both at home and abroad.

c. Practice common courtesy in contacts with other people. Your exemplary behavior will generate goodwill with birders and non-birders alike.

3. Ensure that feeders, nest structures, and other artificial bird environments are safe.

a. Keep dispensers, water, and food clean, and free of decay or disease. It is important to feed

birds continually during harsh weather.

- b. Maintain and clean nest structures regularly.
 - c. If you are attracting birds to an area, ensure the birds are not exposed to predation from cats and other domestic animals, or dangers posed by artificial hazards.
4. **Group birding, whether organized or impromptu, requires special care.**

Each individual in the group, in addition to the obligations spelled out in Items #1 and #2, has responsibilities as a Group Member.

- a. Respect the interests, rights, and skills of fellow birders, as well as people participating in other legitimate outdoor activities. Freely share your knowledge and experience, except where code 1(c) applies. Be especially helpful to beginning birders.
- b. If you witness unethical birding behavior, assess the situation, and intervene if you think it prudent. When interceding, inform the person(s) of the inappropriate action, and attempt, within reason, to have it stopped. If the behavior continues, document it, and notify appropriate individuals or organizations.

Group Leader Responsibilities [amateur and professional trips and tours].

- c. Be an exemplary ethical role model for the group. Teach through word and example.
- d. Keep groups to a size that limits impact on the environment, and does not interfere with others using the same area.
- e. Ensure everyone in the group knows of and practices this code.
- f. Learn and inform the group of any special circumstances applicable to the areas being visited, e.g., no sound devices, permission must be obtained before visiting, etc.
- g. Acknowledge that professional tour companies bear a special responsibility to place the welfare of birds and the benefits of public knowledge ahead of the company's commercial interests. Ideally, leaders should keep track of tour sightings, document unusual occurrences, and submit records to appropriate organizations.
- h. Request that all participants with sound devices defer to the leader before using them.
- i. Organizers of competitive birding events in the state are encouraged to prohibit the use of recordings or other artificial lures during the event.

Please follow this code and distribute and teach it to others.
